Jenny Wu

jw2774@cornell.edu | (203) 666-0130 | linkedin.com/in/jenny-wu

EDUCATION

Cornell University — **Ithaca, NY**
Bachelor of Science in Mechanical Engineering — *Expected May 2028*
- **Relevant Coursework:** Dynamics, Mechanical Synthesis, Statics and Mechanics of Solids, Thermodynamics

TECHNICAL SKILLS

Software	Autodesk Fusion 360, Creo Parametric, MATLAB, Python, Bluebeam, Procore, Excel
Manufacturing	CNC mills and lathes, GD&T;, DFM, 3D printing
Interests	Golfing, swimming, painting, photography, poker

EXPERIENCE

Consigli Construction — **Manhattan, NY**
Field Operations Intern — *Jun 2026 - Aug 2026*
- Coordinated cross-functional teams supporting a 650,000-square-foot office-to-residential conversion project.
- Analyzed daily construction data, field observations, and project documentation to identify issues, communicate updates, and track demolition, scaffolding, and MEP activities.
- Partnered with engineering and operations teams to improve project execution and field decision-making.

Cornell Cup Robotics — **Ithaca, NY**
Mechanical Design & Safety Lead — *Feb 2025 - Present*
- Improved fabrication workflows, reducing 3D-print time by 50% through optimized tolerancing.
- Directed onboarding and safety training for new members on fabrication machinery and workshop procedures.
- Presented engineering solutions and live robotics demonstrations to industry and government stakeholders.

Fairfield County Hunt Club — **Westport, CT**
Seasonal Lifeguard — *Jun 2024 - Present*
- Coached a 50-member youth swim team ages five to twelve and taught swim lessons for all ages, providing structured instruction and individualized feedback.
- Supervised more than 100 patrons while applying risk-assessment and safety protocols to maintain a secure pool environment.
- Conducted chemical and pH testing three times daily to maintain water quality and meet health standards.

Kama Sushi
Server
- Delivered attentive customer service while managing dine-in, takeout, and online orders in a fast-paced restaurant environment.
- Processed transactions accurately, coordinated orders with kitchen staff, and resolved customer concerns promptly.
- Balanced multiple tables and responsibilities while maintaining an organized, welcoming dining experience.

ENGINEERING PROJECTS

SmartSweep — **Ithaca, NY**
Mechanical Synthesis | Project Lead — *Jan 2026 - May 2026*
- Led development of a counter-rotating brush system to remove spotted lanternflies during grape harvesting.
- Engineered quick-swap shafts, support brackets, and motor/bearing mounts; validated 70% removal effectiveness at approximately 0.02 N-m torque.
- Presented recommendations to industry clients and earned second place for Outstanding Problem/Solution.

International Space Station (ISS) Mimic — **Ithaca, NY**
Cornell Cup Robotics | Mechanical Subteam — *Mar 2026 - May 2026*
- Developed an XRP-based platform replicating real-time ISS motion in collaboration with Boeing and Intel.
- Designed a motor-driven gear system and mounting structure enabling precise 360-degree rotation of the central pillar.
- Built a detachable two-axis gantry assembly enabling belt-driven motion and multi-axis repositioning.

Autonomous Submersible — **Ithaca, NY**
Cornell Cup Robotics | Mechanical Subteam — *Jan 2026 - Mar 2026*
- Designed a submersible for EarthEcho's water-quality initiative and microplastics detection.
- Developed a syringe-based ballast system using worm-gear and rack-and-pinion actuation for buoyancy control.
- Modeled and 3D-printed modular electronics trays for integration within a sealed PVC pressure vessel.

RC Car for AR Mapping **Ithaca, NY**

Cornell Cup Robotics | Mechanical Subteam *Aug 2025 - Dec 2025*

- Built a modular 3D-printed RC platform for camera-based real-time AR mapping and pose tracking.
- Engineered a modular chassis and camera mount using snap-fit and fastened joints across more than ten components.
- Improved steering precision through direct servo integration and optimized 0.30 mm snap-fit tolerances.

ACHIEVEMENTS

- Second Place, Outstanding Problem/Solution, Cornell Mechanical Synthesis, 2026
- Southern Connecticut Conference Scholar-Athlete, 2024
- Visual Arts Department Medal, 2024
- Francis Service Award, 2024
- First Place, Sikorsky STEM Challenge, 2023
- Scholastic Art & Writing Awards Publication Selection, 2023

CERTIFICATIONS

- OSHA 10-Hour Construction, OSHA Training Institute, 2026
- Red Apron Certified, Cornell University, 2026
- Procore Certified, Procore Technologies, 2026
- First Aid/CPR/AED Certified

EXTRACURRICULAR ACTIVITIES

- Mechanical Design & Safety Lead, Cornell Cup Robotics
- President and Co-Founder, Coding Club
- Design Team Group Leader, Engineering Team
- Captain, Varsity Golf
- Student Ambassador, Academy of Our Lady of Mercy - Lauralton Hall
- Member, Cornell Poker Club and Cornell Chinese Student Association
